## EXPERIENCE

Associate Application Developer

ADP | Norfolk, VA

July 2019 - Present

- Maintained over 3,000 production systems as a Site Reliability Engineer alongside an agile scrum team with full-stack skillset.
- Made systems automation more user friendly and robust by designing front-facing products in Node/AngularJS, including a client scheduling system, to allow stakeholders to interface with core team offerings.
- Identified and implemented event driven automation solutions in Ansible to eliminate 50% of systems operation toil.
- Completed collaborative technology development on-boarding project course with instruction in MySQL, SpringBoot, Node/AngularJS, and Express.
